- 3. Technology as an Enabler
- 4. Lessons and Challenges
- 5. Key Victories and Best Practices
- 6. Audience Questions and Discussion

Apr 30 - May 1, 2013 | Mandarin Oriental, Las Vegas, NV

GRC Organization Overview

Sterling Bank:

- Pacific Northwest community bank, four states, 184 branches, headquartered Spokane, WA
- \$9.3 billion in assets
- NASDAQ: STSA

Recapitalization August 2010:

- \$730 million equity infusion
- Anchor investors Warburg Pincus and TH Lee
- Board and management reconstituted

Newly Recapitalized Bank

- Regulatory enforcement actions
- Fragmented risk management staff structure (holding company and bank)
- Past growth through acquisition included disparate processes and standards
- Silos of risk information in SharePoint, spreadsheets, word documents
- Newly formed Executive Credit and Risk Committee

Apr 30 - May 1, 2013 | Mandarin Oriental, Las Vegas, NV

GRC Program Objectives and Strategies

Regulatory and Board Expectations

- Integrated and effective risk management processes
- Top down and bottom up approach to identify, measure, monitor and manage risk

Program Objectives:

- Single source for GRC data to provide a holistic view of risk
- Ensure Board and Management are focused on the right risks
- Drive risk culture across the bank

Program Strategies:

- Establish Common risk library and hierarchy for reporting
- Establish common taxonomy of risks and controls
- Central Repository to measure and trend risk data
- Establish risk metrics for each Risk category

Role of Technology in Program

- Catalyst for establishing sustainable risk culture
- Ability to track and trend data for Management Committee and Board reporting
- Ability to isolate changes in testing for immediate action

GRC Technology as an Enabler

MetricStream Solution Areas in production

- GRC Library
- Compliance
- Issue Management
- Time Tracking
- Loss Management
- Risk Management
- KRI/KPI

MetricStream Solution Areas currently in implementation

- Internal Asset Review (Loan/Credit review)
- IT GRC
- Policy Management

Apr 30 - May 1, 2013 | Mandarin Oriental, Las Vegas, NV

Lessons and Challenges

Implementation Lessons:

- Stakeholder buy-in and readiness
- Project scope
- · Content vs. Technology
- Resource commitment

ERM Challenges:

- No prescriptive format, still an immature discipline
- Obtaining business unit management buy-in
- Education of users about risk management and the GRC tool
- Need for robust reporting to address changing requirements

Apr 30 - May 1, 2013 | Mandarin Oriental, Las Vegas, NV

GRC Key Victories and Best Practices

Key Victories:

- Risk management 1 of 4 top line corporate goals
- Regulatory acceptance of risk management program
- Management buy-in
- GRC system as a single source of truth

Best Practices:

- Organizational consolidation of Risk Functions
- Executive and board level risk committees with assigned risk accountability
- Single risk framework and nomenclature

The Road Ahead:

- Risk ratings become objective data driven values
- KRI's alert management to prospective risks
- Customized risk dashboards for management

GRC SUMMIT 2013

Apr 30 - May 1, 2013 | Mandarin Oriental, Las Vegas, NV

Critical elements that goes into a making successful deployment and implementation

Have a Plan before Implementation Starts

- Understand your internal business requirements and goals
- Align key internal decisions across cross functional teams before implementation begins
- Document your requirements to the level of detail appropriate for the scale and size of your project

Start Simple

- Map solutions to our standard products whenever possible
- Avoid designing overly complex solutions that address every conceivable business scenario (80/20 rule)
- Consider a phased approach for complex or multi-solution initiatives

Be Engaged

 Make sure stakeholders and resources have sufficient time to participate in the implementation and perform their "day jobs"
